Faculty Mentor: **Dr. Mansi Kajal**

Project Overview

1

Smart Digital Wardrobe is an intelligent system to manage clothing items digitally.

2

It helps users choose suitable outfits easily and quickly.

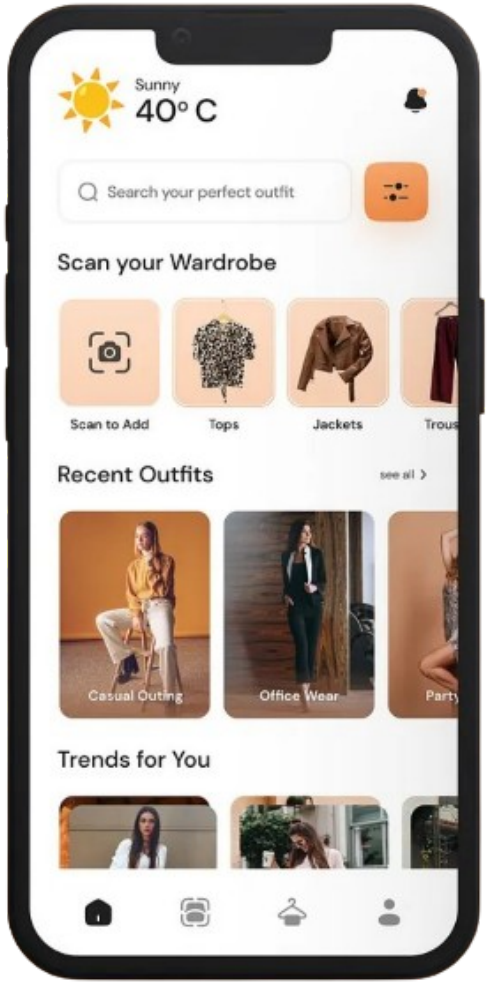
3

The system provides outfit suggestions by evaluating various input factors:

- Color combinations
- Weather conditions
- Personal clothing collection

4

It reduces confusion and saves time in daily outfit selection.



Specific Objectives

Reduce Time and Effort

Core goal of the system

Weather-Based Outfit Suggestions

Tailors outfits to the climate

Color-Matching Suggestions

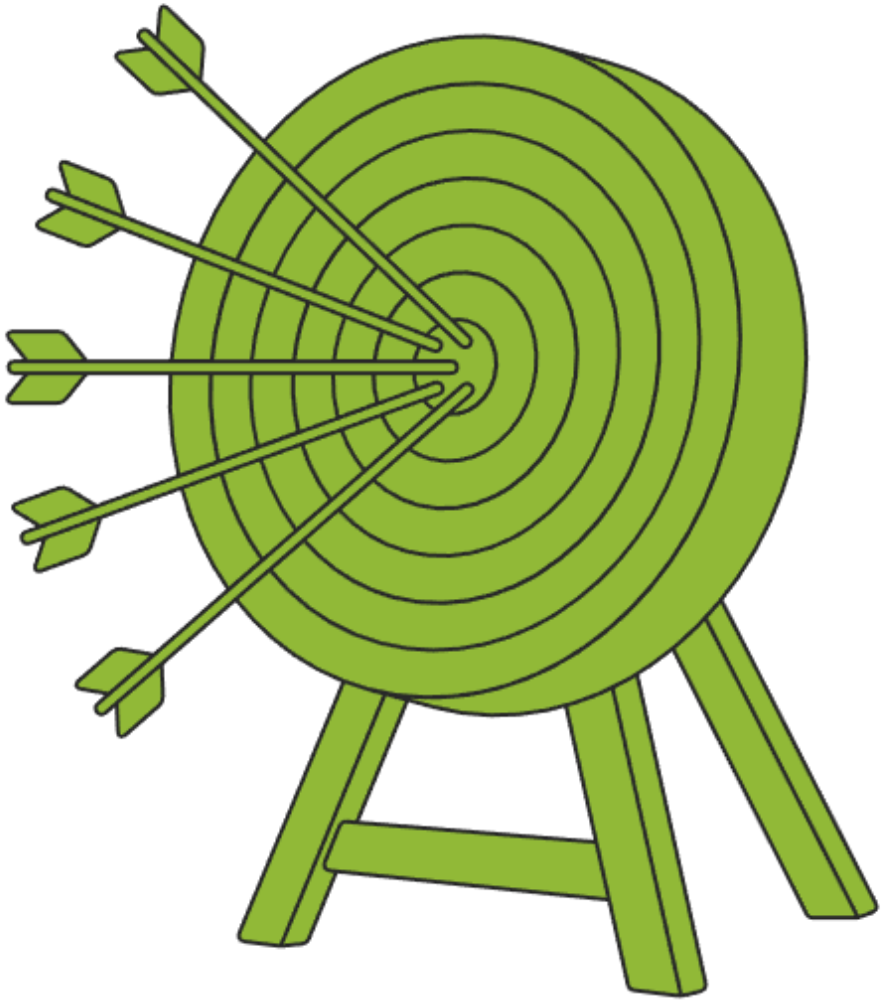
Enhances visual harmony

Intelligent Outfit Combinations

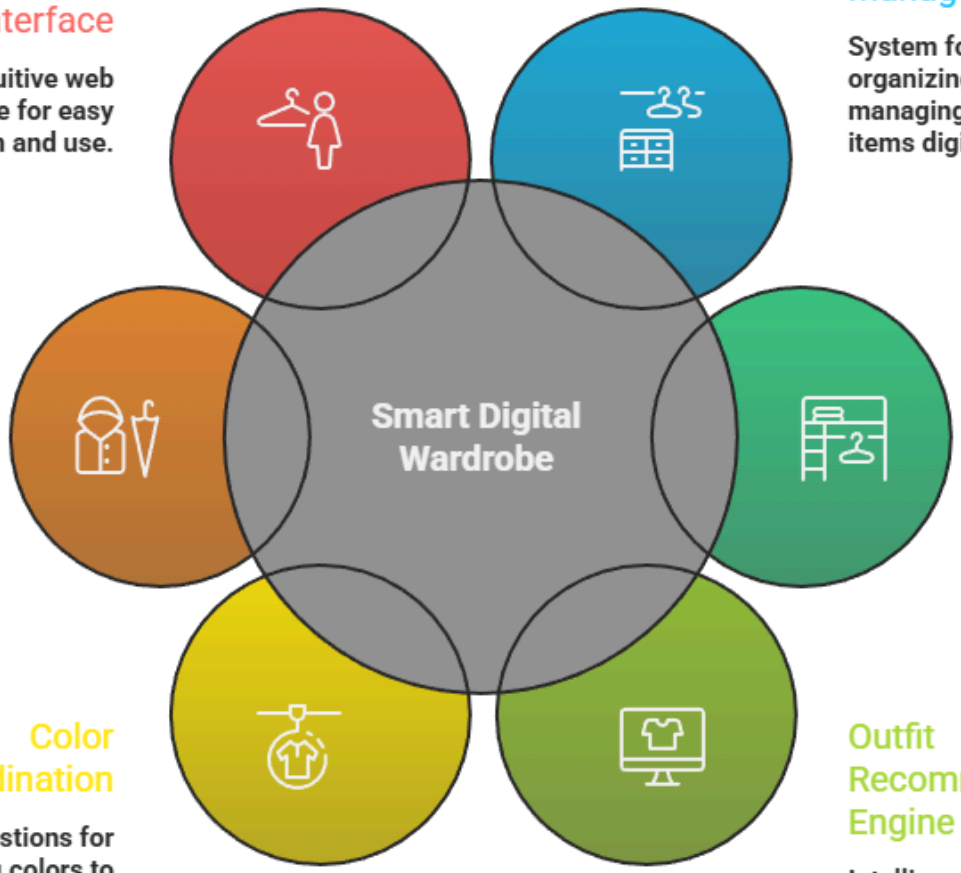
Creates stylish ensembles

Digital Organization

Foundation for system functionality



Key Features



User-Friendly Interface

Intuitive web interface for easy navigation and use.

Digital Wardrobe Management

System for organizing and managing clothing items digitally.

Weather-Based Recommendations

Outfit suggestions tailored to current weather conditions.

Categorization

Organizing clothes by type, color, and usage for easy access.

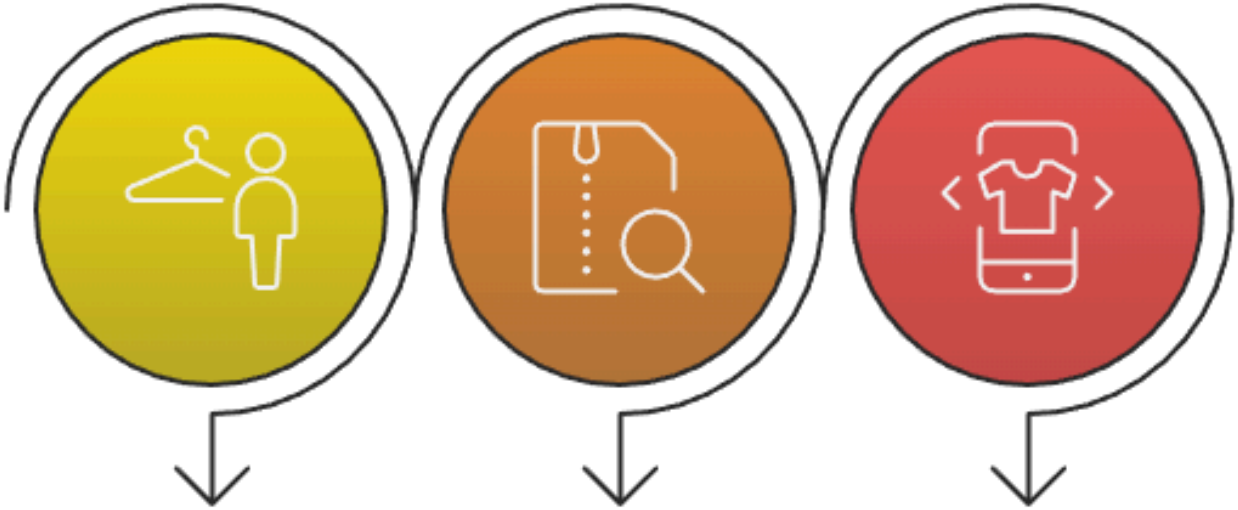
Color Coordination

Suggestions for matching colors to create harmonious outfits.

Outfit Recommendation Engine

Intelligent system that suggests outfits based on various factors.

Project Use-Cases & Scope



Use Cases

Daily outfit selection, choosing outfits for special occasions, seasonal wardrobe planning, and improving personal fashion sense.

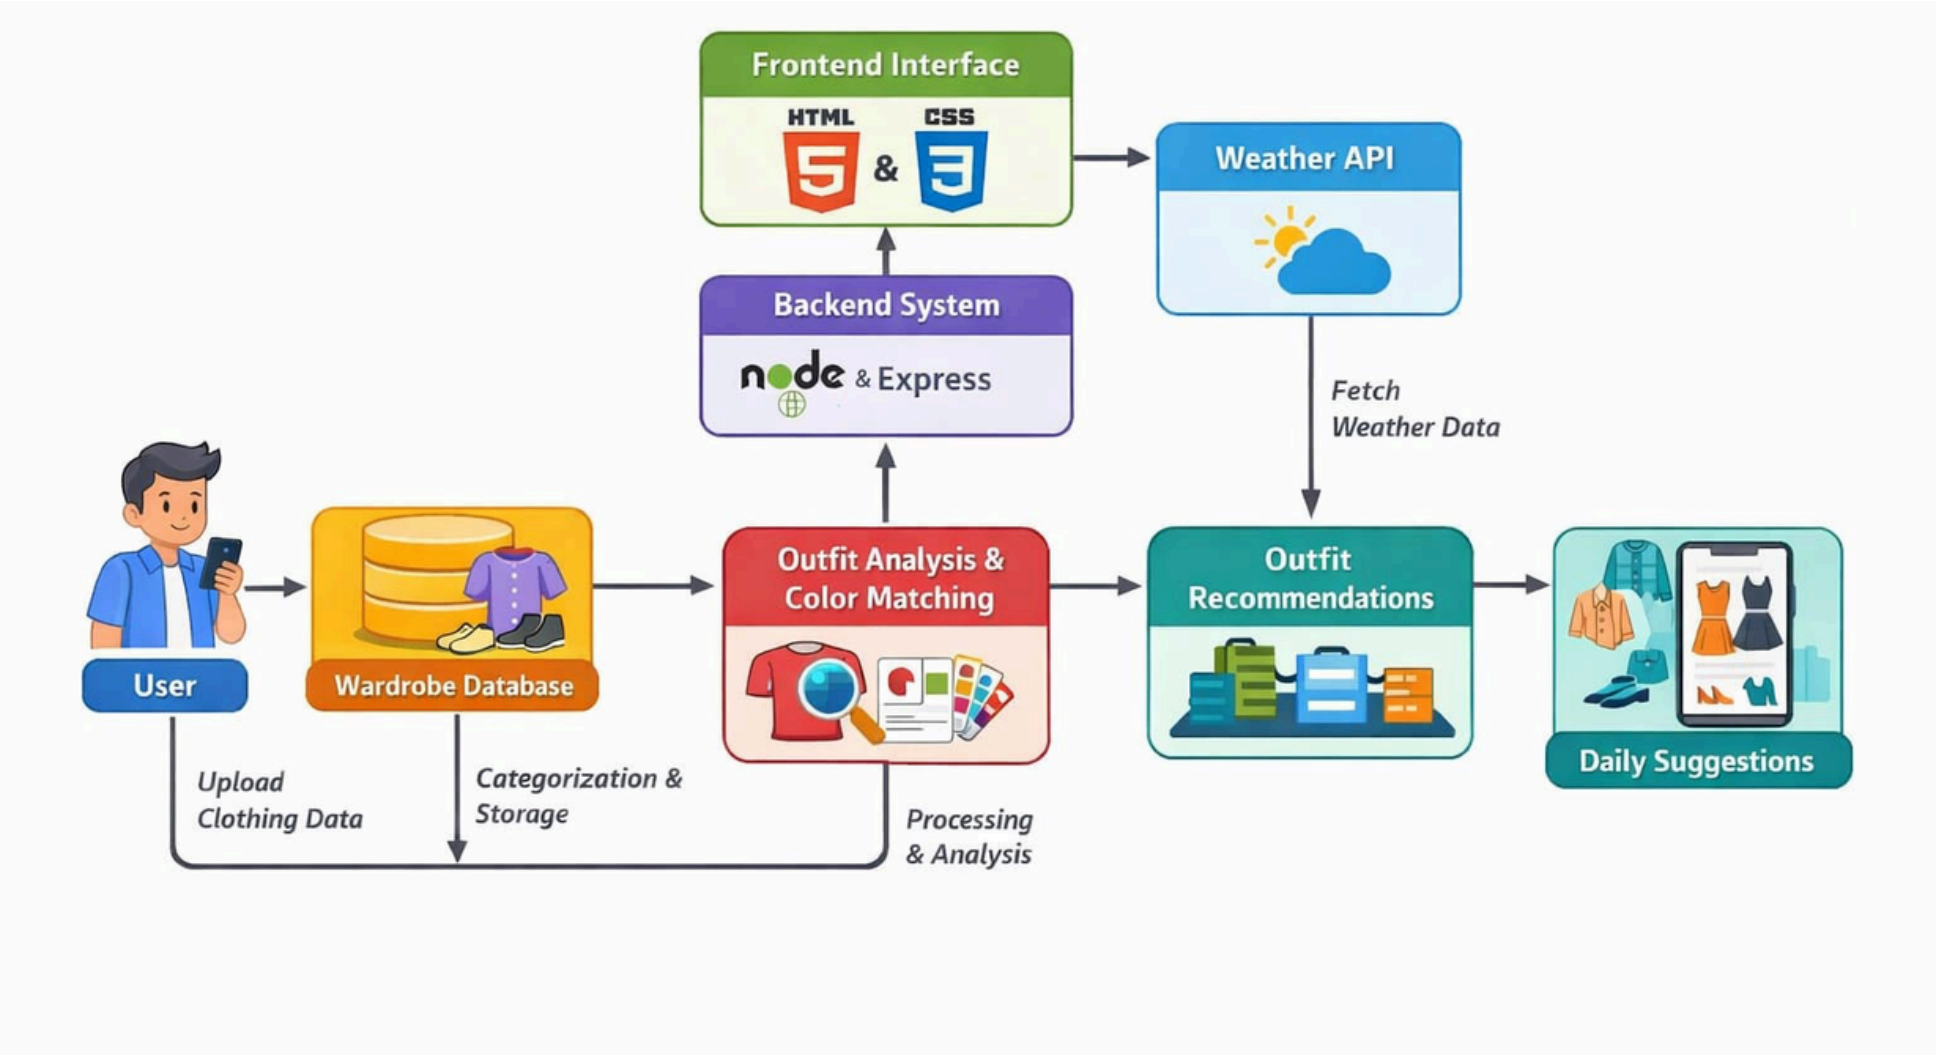
Scope

Personal wardrobe management for individuals, outfit recommendations using rule-based logic.

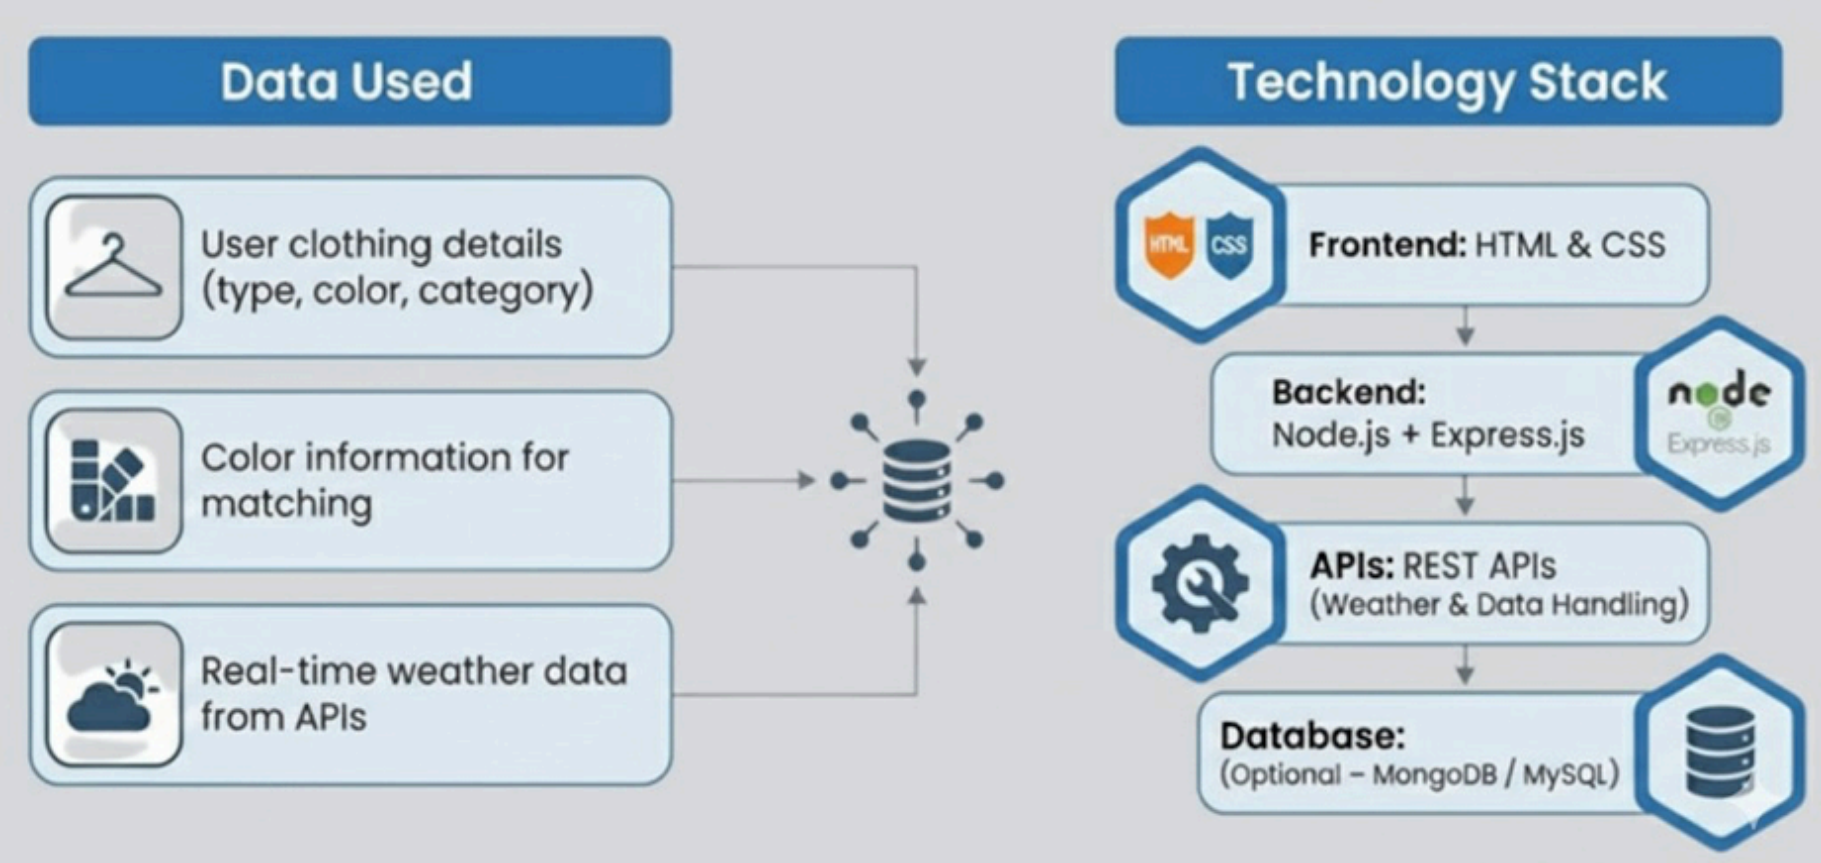
Extensions

Can be extended to online shopping integration, AI-based fashion suggestions, and mobile application support.

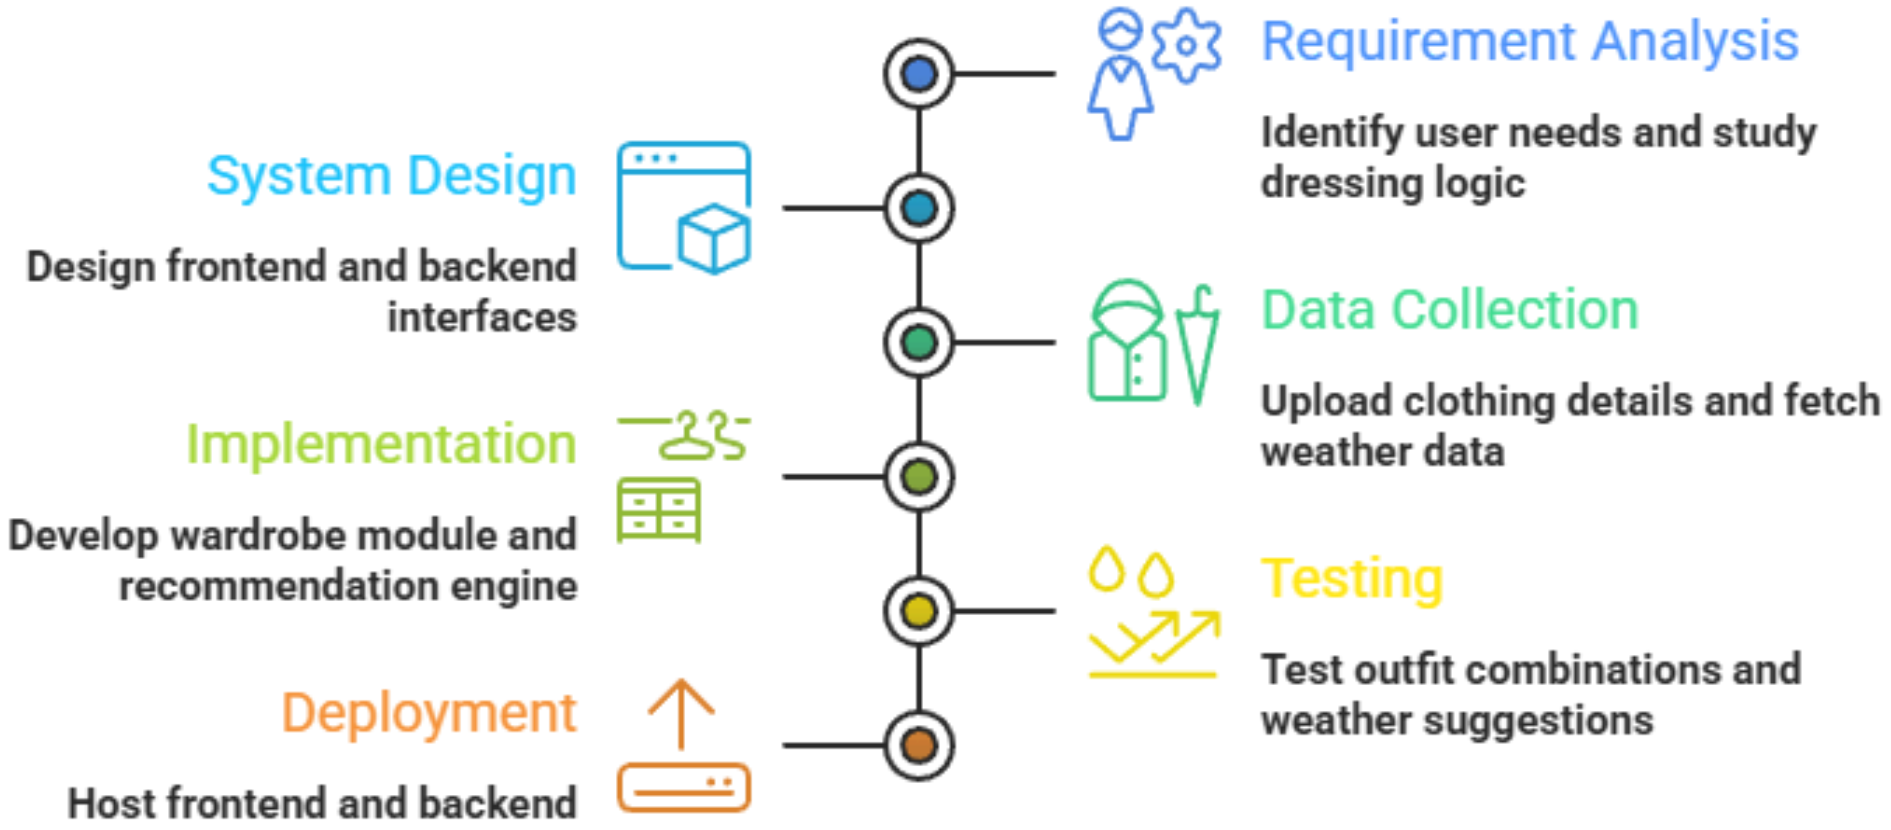
Prototype/Project Flow diagram/Architecture



Data & Resources



Methodology



Expected Results & Impact

Characteristic	Expected Results	Impact
Wardrobe Management	Easy digital management	Saves time
Outfit Combinations	Suitable combinations daily	Reduces confusion
Color Coordination	Accurate suggestions	Improves dressing sense
Weather Advice	Weather-appropriate advice	Promotes organized usage

Project Timeline

Phase	Activity	Timeline (Weeks)						
		Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7
Phase 1	Requirement Analysis & Research							
Phase 2	System Design (UI + Backend Structure)							
Phase 3	Frontend Development (React)							
Phase 4	Backend Development (Node + APIs)							
Phase 5	Recommendation Logic & Integration							
Phase 6	Testing & Debugging							
Phase 7	Final Deployment & Documentation							

THANK YOU
